LUCAS ZORRER

Backend Developer · PHP / Laravel · Node.js

Garibaldi, Brazil · lucas@zorrer.com.br · linkedin.com/in/lucaszorrer

Brazilian–Italian dual citizen (eligible to work in the EU) · Open to remote roles worldwide

SUMMARY

Backend developer with 3+ years of experience building, modernizing, and operating web and mobile products, currently the technical reference of a small development team. Specialized in PHP (Laravel and legacy 5.x/7.x systems) and Node.js, with deep experience in payment gateway and banking API integrations, relational databases (MySQL, PostgreSQL), Redis, CI/CD automation, and server infrastructure (virtualization, DNS, cloud and on-premises environments). Comfortable owning systems end to end — from architecture and infrastructure to delivery — and mentoring other developers along the way.

EXPERIENCE

Full Stack Developer (Tech Lead) — Nuvola Host **Dec 2023 – Present**

- Act as the team's technical reference: define technical direction, coordinate delivery, and mentor two junior developers.
- Modernized and maintain a business-critical legacy ERP (PHP 5.5, MySQL), delivering performance and usability improvements while keeping the system in production.
- Designed and built integrations with payment gateways and banking systems — Safe2Pay, Banco do Brasil, Banco Inter, and Sicredi — via REST APIs and remittance/return file processing.
- Developed new products from scratch with Laravel (PHP 8.x) backends and React Native mobile apps, including API design, authentication, and deployment.
- Maintain and extend customized management systems for internet service providers (ISPs), optimizing ERP workflows and business processes.

Full Stack Developer — Dezwork Ecommerce Solutions **Dec 2023 – Present**

- Develop and maintain e-commerce stores and the merchants' management dashboard (PHP, MySQL), serving multiple online stores in production.
- Integrated payment gateways (Asaas, Safe2Pay, Pagar.me, Vindi/Yapay) and built a subscription billing system with recurring credit card payments.
- Built a customer rewards system that grants redeemable points on product purchases.
- Led the migration of the company's entire infrastructure from AWS to an on-premises datacenter — planning, provisioning, and cutover — cutting hosting costs by ≈€340/month (~€4,000/year).
- Managed AWS infrastructure and designed/implemented new storefront templates.

Web Development Intern — Includer **Feb 2023 – Dec 2023**

- Developed backend features with Laravel and PostgreSQL, including database migrations and seeders.
- Built frontend features with React.js.

SKILLS

Backend: PHP (5.x–8.x), Laravel, Zend Framework, Node.js, TypeScript, REST APIs, payment & banking integrations

Databases: MySQL, PostgreSQL, Redis

DevOps & Infrastructure: Linux, Docker, AWS, Proxmox (VM provisioning), domain & DNS configuration, Git, CI/CD pipelines, server administration

Frontend & Mobile: React.js, React Native, JavaScript, TypeScript, HTML, CSS, Tailwind CSS

EDUCATION

B.Sc. in Computer Science — University of Caxias do Sul **2024 – Present**

Technical Diploma in Internet Information Technology — Federal Institute (IFRS), Brazil **2021 – 2023**
